

The Utah Association of Energy Users (UAE) announces its new Board of Directors for 2009.

Shannon Storrud, environmental and energy engineer at Hexcel will begin serving his one-year term as elected president of UAE. Storrud replaces Stan Lockhart, government affairs director for Micron Technology/IM Flash Technologies, and has been serving this past year as president-elect. Stan will remain on the Board as a director.

Formed in 1986, UAE consists of industrial and commercial companies throughout Utah that are large consumers of electricity and/or natural gas. Collectively, these companies employ some 40,000 people at highly technical, highly paid jobs. Among UAE members are natural gas, oil, aerospace, health care, higher education and manufacturing firms. Joining the Board this year is Alex Woodruff, commercial development advisor for Anadarko Uintah Midstream. Remaining directors are Ben Berrett, director of facilities operations, Utah State University, Teresa Brown, regulatory consultant for Chevron, Ron Day, accounting manager of the Central Valley Water Reclamation Facility, John Gibson, president and CEO of American Pacific, Stan Lockhart, government affairs director for Micron Technology/IM Flash Technologies, Mark May, president of May Foundry, Don Sturtevant, corporate energy manager for Simplot, Joan Walker-Ratliff, director of regulatory affairs, ConocoPhillips, and Roger Weir, ATK Launch Systems Energy Manager.
